EDUCATION

The University of Iowa | Iowa City, IA

Expected May 2027

B.A., Informatics (Human-Computer Interaction), Minors in Psychology and Spanish

- **Scholarships:** Freeman Foundation Asian Internships Scholarship, Morse-Gilman Scholarship, LULAC Scholarship
- **Coursework:** Research Methods in HCI, Human-Computer Interaction, Server-Side Development for Informatics

TECHNICAL SKILLS

- **Design:** Figma, design thinking, information architecture, user flows, wireframing, interactive prototyping, conversational UI, design systems and tokens, accessibility
- **AI Tools:** Claude, Claude Code, MCP integrations (Figma, Notion, Linear, Google Drive), AI-driven design to code workflow
- **Research:** User research, UX audits, usability testing, user studies
- **Development (AI-assisted):** Flutter (Dart), React, TypeScript, Python, HTML, CSS, Razor (CSHTML)
- **Tools:** Git, GitHub, VS Code, Visual Studio, Xcode, Trello, Notion
- **Spoken Languages:** English and Spanish (fluent)

WORK EXPERIENCE

Sollo

Jun 2026 to Aug 2026

UI/UX Engineering Intern

Tokyo, Japan

- Merged 70+ pull requests in 8 weeks across design, mobile front end, and Python backend, and shipped to the App Store
- Wrote specs in Notion, had Claude draw options in Figma, presented them to the team, then built the chosen one with Claude Code
- Ran a UX audit and redesigned the app's navigation, presenting HCI-based proposals to the full team
- Made the core browse flow 8x faster (1,033 ms to 125 ms) in a home screen redesign, with 2,949 tests green at handoff
- Built a 24-screen interactive Figma prototype of the full user flow and restructured the topics information architecture
- Designed a conversational AI fallback so empty searches open into a chat with the AI instead of a dead end
- Reviewed the article library for clarity, accuracy, and tone, flagging possibly hallucinated AI claims
- Shipped onboarding in 9 languages on a shared token system, with component and accessibility docs for handoff

University of Iowa Health Care, Internal Medicine

May 2026 to Present

Student Database Assistant

Iowa City, IA

- Review internal web pages and use AI tools to find and fix issues in the HTML, CSS, and Razor (CSHTML)
- Check AI-suggested fixes against the live pages before submitting, inside a large health system's web platform
- Set up my own .NET developer environment, including IIS, NuGet feeds, Git Extensions, and KDiff3

PROJECT EXPERIENCE

Centline | Founder, Trucking App for New Owner-Operators

Jul 2026 to Present

- Own the product direction, roadmap, branding, and business model of my own startup, now in testing
- Designing it end to end so every load is one record from saved to paid, and drivers see what a load actually nets
- Building it in Flutter with Claude Code: 144 merged pull requests and 5,888 tests so far

CommU | Web App for Commuter Students

- Interviewed five commuter students, then designed the app around their answers and built it with AI-assisted development
- Took it through four design phases, ending with a full user study to test and refine the design

Component Lab | Accessible UI Components

- Built keyboard-accessible React and TypeScript components with no UI library, themed light and dark from one token file

LEADERSHIP

LULAC Collegiate Council #373, University of Iowa

Mar 2025 to Present

Fundraising Chair (previously Public Relations Officer)

Iowa City, IA

- Lead fundraising for the council, and helped recharter it and design its social media and branding as PR Officer
- Organized a campus tour for high schoolers with Open Heartland and translated its flyer and form into Spanish
